EDUCATION

B.E. Electronics & Communication Engineering
Atria Institute of Technology, Bengaluru, Karnataka
May 2024

CERTIFICATIONS

- Certified Ethical Hacker (CEH) - EC-Council
- Defensive Security Operations - Cybrary
- Cyber Security Fundamentals - Palo Alto Networks
- Introduction to Cybersecurity - Cisco Networking Academy

TECHNICAL SKILLS

SOC & Threat Detection

SIEM / ELK Stack | IDS/IPS | DLP | Malware Analysis | Log Analysis

Security Testing

VAPT | Nmap | GoPhish | Kali Linux

Frameworks & Compliance

ISO 27001 | Cyber Kill Chain | CIA Triad | SPF/DKIM/DMARC

Languages & Tools

Python | PowerShell | SQLite | Flask

NAVYA REDDY MUKTHAPURAM

Security Analyst | SIEM · Threat Detection · Incident Response · CEH Certified

Security Analyst with **3 years** of hands-on experience in SOC operations, threat detection, and incident response. **CEH certified** with practical exposure to **SIEM platforms (ELK Stack)**, **VAPT (Vulnerability Assessment & Penetration Testing)** support, malware and log analysis, and email-authentication protocols **(SPF, DKIM, DMARC)**. Skilled in applying AI-assisted detection workflows and automation to streamline SOC operations, and in translating security findings into clear reporting for both technical and management audiences.

PROFESSIONAL EXPERIENCE

Security Analyst
Jun 2024 – Present
Xevyte Technologies Pvt. Ltd.

- Monitor, detect, and triage security alerts in real time across **SIEM platforms including ELK Stack**, identifying potential threats and anomalies
- Plan and execute internal phishing simulation campaigns using **GoPhish** to strengthen employee awareness and phishing resilience
- Analyze **malware, DLP, and IDS/IPS alerts** – ensuring timely escalation, documented investigation notes, and closure
- Develop and maintain incident cases in coordination with SOC teams, recommending corrective actions based on findings
- Prepare client- and management-facing reports summarizing security trends, incidents, and key metrics against organizational policy
- Apply **AI-driven tools and automation** techniques to improve detection efficiency and streamline SOC workflows
- Support network security, firewall configuration, and email authentication **(SPF/DKIM/DMARC)** aligned with **Cyber Kill Chain** and **CIA Triad** principles

IoT Edge and Gateway Intern
Aug 2023 – Sep 2023
Cranes Varsity

- Built an IoT edge and gateway system using **Raspberry Pi, Python, Flask**, and sensors for real-time monitoring, cloud integration, and automation
- Demonstrated scalable edge-computing concepts for IoT applications through hardware/software integration

KEY PROJECTS

Ethical Phishing Campaign
GoPhish · MailHog · Security Awareness

- Planned and ran **controlled phishing simulations** to evaluate employee awareness of email-based threats, converting findings into targeted awareness improvements

ISO 27001 Implementation Support
Risk Assessment · Documentation · Audit Readiness

- Supported **ISO 27001** implementation through documentation, risk assessment, and internal audit-readiness activities, recommending enhancements for compliance

> **Additional builds:** Python-based Windows System Analyzer for endpoint reconnaissance & IT auditing · WSN-based cattle health monitoring system (ESP32) · OCR/TTS accessibility application (Python)
